EXPERIENCE

Full Stack Developer

Katonic AI

06/2024 - Present Remote

- Built a centralized Tenant Manager that **replaced 2-3 hours of manual per-customer setup with automated tenant onboarding, resource provisioning, and billing on a single cluster**
- Architected a usage-based billing engine **enabling Katonic AI's transition from on-prem to a multi-tenant SaaS model, supporting sub-business onboarding, per-tenant GPU cost tracking, and tiered pricing via Prometheus**
- Built Adaptive Studio from scratch, a self-serve LLM deployment platform (TGI/VLLM) enabling tenants to deploy models from Hugging Face or custom datasets on GPU/CPU, **powering AI Studio's GenAI apps and the copilot product (ACE)**
- Developed AI Studio with DS and DevOps teams, a GenAI platform for text, document, audio, and image processing apps, configurable smart copilots with embeddable chatbot widgets, **deployed live on an Indian state government portal**
- Built an integrated developer environment in AI Studio with on-demand Jupyter/VS Code workspaces, persistent storage (PVC), and one-click app deployment via GitHub/GitLab supporting Streamlit, FastAPI, React, and Node.js
- Implemented Loki-based centralized logging and distributed telemetry across all platform services, **reducing incident debugging time from 12+ hours to under 1 hour**
- Shipped Groq Orpheus TTS to production, engineering WebSocket lifecycle management and **audio streaming for real-time voice AI**, and **authoring the published technical deep-dive and engineering guide**

Full Stack Developer Intern

Katonic AI

02/2024 - 05/2024

- Gained deep understanding of the platform architecture while enhancing frontend components using **React.js, Redux, and Sass, improving UI consistency and component performance**
- Delivered 2-3 UI user stories end-to-end**, integrating schema-driven form validation (Formik + Yup) across multiple modules and streamlining data entry workflows

SKILLS

Backend

Node.js, Express.js, Python, REST APIs, GraphQL, WebSockets, JWT, OAuth 2.0

Frontend

React.js, Next.js, Redux, Tailwind CSS, Sass/SCSS, Vite

Databases

MongoDB, PostgreSQL, Redis, MySQL, Milvus, Qdrant, Elasticsearch, DynamoDB

DevOps & Cloud

Kubernetes, Docker, CI/CD, GitHub Actions, NVIDIA MIG, Prometheus, Grafana, AWS, GCP

Tools & Practices

Git, Linux, Keycloak, Microservices, MCP, NPM Publishing, Agile/Scrum

Testing

Jest, Supertest, React Testing Library

SUMMARY

Full Stack Developer | Multi-Tenant Architecture | AI/ML Platform Engineering | Open Source Contributor with over **2.5 years** of experience building enterprise SaaS platforms from the ground up. **Built two core products at Katonic AI: Adaptive Studio (LLM deployment) and AI Studio (GenAI application platform)**, serving tenants including an **Indian state government portal**. Active open-source contributor with **multiple NPM packages and MCP servers adopted by the developer community**.

EDUCATION

Bachelor of Technology in Computer Science & Information Technology

[Acropolis Institute of Technology and Research](#)

08/2019 - 08/2023

Indore, India

CGPA: 8.4 / 10

PUBLICATION

[Production Voice AI with Groq Orpheus TTS](#)

PROJECTS

Voiceforge

- AI agent platform to create voice or text agents in **7 steps** with **10+ knowledge connectors, Copilot Kit for in-chat UI, Composio for 1000+ MCP integrations, multi-channel deployment**, and Lite LLM-based cost tracking with plan-based limits.

Msgly

- Unified NPM messaging library for WhatsApp, Telegram, Instagram, Messenger, and LINE with a single API. **500+ average weekly downloads**.

Lock Vault

- Drop-in authentication for Node.js apps with JWT, sessions, TOTP/2FA, and OAuth in one zero-dependency package. **500+ downloads in month one**.

MAAPS

- Industrial asset management system with QR-based tracking and real-time maintenance alerts, monitoring **500+ equipment assets** with an AI agent grounded in live operational data.

OmniDB

- Gives LLMs safe access to **22+ databases** (PostgreSQL, MongoDB, Redis, Neo4j, DynamoDB) with built-in SQL injection protection and rate limiting.
- Adopted by 80+ developers.
